Registration is Open

The AAA Foundation for Traffic Safety, Arizona State University and Arizona Commerce Authority are pleased to announce that registration for the 2022 Forum is now open. Detailed information and the registration link are available on AAA Foundation's website.

Day 1 of the 2022 Forum on Tuesday, April 5 will consist of three panel sessions:

1. *State of Vehicle Automation Development & Deployment*
2. *Moving toward Higher Levels of Automation: Lessons Learned & Challenges*
3. *Moving toward Higher Levels of Automation: Opportunities & Next Steps*

Each panel session is 75 minutes in length to create many opportunities for interactive discussion and conversations between panel speakers and participants. At the conclusion of Day 1, there will be a Forum dinner to provide more opportunities to allow participants to continue conversations in a relaxed atmosphere.

Day 2 will focus on small group discussion and identify research needs. Technical activities are also being planned after the conclusion of the 2022 Forum.

The number of attendees for the 2022 Forum will be capped at **100** so we can better manage the discussion. We look forward to seeing you this April.
